

Abraxas Tourism

Integrity tourism information system

Our tourism system enables to dedicate more time to your clients and plan better tourist arrangement.

The system satisfies needs of small and big tourist agencies.

Program is shaped modular, so we can upgrade it with functions that are needed for business operations in your tourist agency.

Tourist agency has a lot of competition in global market. With our program package Abraxas Tourism have agencies precedence over others. With entirety technical support we can assure you optimal run of business operations, shorter sale and booking time, lower costs and bigger profit.

Abraxas Tourism can completely control business operation support of tourist agency. Program includes all needed information for work of tourist agency; it just depends which package you pick.

Basic module

Abraxas Tourism basic module includes directory with names of clients and partners.

Program includes the list of different ciphers:

- General list of ciphers includes list of states, posts, taxes, companies, branch offices, etc.
- Ciphers for bookkeeping have information about paying resources,

discounts, exchange rate, etc.

- List of tourist ciphers includes catalogues, destinations, tourist services, capacity etc.

List of ciphers offers also some other products: book borrowing, bicycles borrowing etc.

Basic module helps to make simple tourist arrangements and to trade with them. Module also notes incoming payments and has control over the monetary operations.

Module makes possible to copy out all documents that are needed for business operations: contracts, voucher, bills, etc. and makes possible to analyze business operations, business overview, guest overview, debts and paying overview.

Enlarged module

Enlarged module includes more upgraded functions as the basic. It makes possible to enter data about incoming bills, analyze RVC, have store overview, importing of different exchange rate and making documents that are obligated with travel cancelation.

Accommodations in hotel

Module includes list of hotel ciphers, price list of hotel services, booking, client reception and their documentation.

Calculations

The main thing about Abraxas Tourism is calculations.

With calculations is possible to make complex arrangements, simulation of influence of particular components on the price of arrangement are lower, etc. You can define special discount offers (First Minute, Last Minute, 6=7...).

You can make your own capacity list.

You can supervise scales and systems of commission and mediators. The rules of commissions for partners, mediators, sales, special discount offers, etc. can be defined regarding quantity and other parameters.

Business operation on internet

Abraxas Tourism program can be base for internet business for tourist agencies. People can see on your internet side all information about capacity and reservations on – line.

Integration

Program is compatible with other applications. It can be integrated with system Amadeus and with program CETS. Data about incoming and outgoing bills, payments and exchange rate can be imported and exported.

Additions

Wireless pocket PC can be connected with program and offers updated list of passengers. You can access to other data like are: lists of transfer, data about the business and other data.

Graphic interface enables review of capacity of single object by reservations (hotel, bus, airplane)
